PROFESSIONAL SUMMARY

Dedicated and detail-oriented iOS Engineer with a Bachelor of Computer Applications (BCA) and professional experience developing high-performance native iOS applications and mobile platforms. Specializes in Swift, SwiftUI, modern Apple Human Interface Guidelines, and AI-accelerated workflows (Antigravity, Claude Code, Cursor). Proven expertise building reactive, resilient mobile architectures with offline synchronization and real-time telemetry.

TECHNICAL SKILLS & CORE COMPETENCIES

- **Native iOS & Apple:** Swift, SwiftUI, UIKit, CoreLocation, AVFoundation, CoreHaptics, Combine, SwiftData, Instruments, Metal MSL
- **AI-Accelerated Tooling:** Google Antigravity, Claude Code, Cursor, Git, Terminal Automation, MCP Servers
- **Core Languages:** Swift, C, C++, Python, JavaScript (ES6+), HTML5, Vanilla CSS3, MySQL
- **Web & Full-Stack:** React, Responsive UI/UX Architecture, REST APIs, Node.js Runtime, High-Performance Systems
- **Architecture & CS:** Object-Oriented Design, Concurrency & Actors, MVVM-C, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

iOS & Systems Engineer — MMD Powerboat Marines Pvt Ltd

2024 — Present

- Spearheaded digital mobile infrastructure and end-to-end app ecosystem conversion for powerboatmarines.com.
- Architected native iOS client showcase tools and high-performance interactive specifications visualizations.
- Engineered offline telemetry caching and live mobile diagnostic dashboards for field operations and vessel tracking.

Independent iOS Engineer & App Architect

2023 — Present

- Engineered **SoIX**: native iOS golden-hour camera tool with real-time astronomical ephemeris computation.
- Designed tactile shutter dials with CoreHaptics and local NOAA solar position models running with 0 external API dependencies.
- Built high-performance audio synthesis architectures in Swift with custom C++ DSP audio kernel integration.

FEATURED PROJECTS

- **SoIX (iOS App):** Golden-hour photography assistant with solar ephemeris calculations, twilight angles, and haptic shutter controls (Swift, SwiftUI, CoreLocation).
- **MMD Powerboat Marines App:** Dedicated iOS vessel visualizer and sea-trial booking portal for international yacht showcases (Swift, WebKit Bridge, REST).
- **BREWME Platform:** Commercial web platform for Madayipara Eco Park cafe in Kannur with dynamic QR menus, interactive feast platters, and real-time pricing.
- **Aether Audio Engine:** Low-latency 32-bit floating point audio synthesis engine built with AVAudioEngine, Metal spectrum FFT, and C++ DSP.

EDUCATION

Bachelor of Computer Applications (BCA)

Graduated

Core Studies: Object-Oriented Programming, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks.
